

EXOTIC PET PREPAREDNESS

Avian Preparedness:

- Transportation of pet birds is best accomplished using small, secure, covered carriers to avoid injury
- If traveling in cold weather, always warm the interior of your vehicle before moving your bird(s) from the house to the vehicle
- Transfer your bird(s) to a standard cage upon arrival at the evacuation site; covering the cage may reduce stress; make the transfer in a small enclosed room to reduce the risk of escape
- Necessary dietary supplements, plant mister for cooling birds in hot weather, hot water bottle for warming birds in cold weather, materials to line the bottom of the cage, cage perch, and toys

**Check with your local
veterinarian about
boarding your pets during
high risk severe weather**
